ADMIN TESTING FACILITY

Rigg Access

If you have downloaded this test document you should now be aware of the usefulness that a system like this can bring

Less than **4Mb** is the ideal size but we have a generous limit of **10Mb**, I think you will agree that a great deal of information can be included in a document of such size.

If your CV is larger than 1Mb for the free version, edit out the large graphics [or whatever else is causing the large file size] then take a look at it again.

Once you are happy with it, upload it to our server for the world to see....!
