

IRATA Rope Access Training Comes To Thailand

After nearly a year in setting up a new rope access, first aid, working at height, confined space and rigging training school has opened in Thailand.

Safe Access Systems has been set up to cater for the increasing numbers of rope access technicians living and working in South East Asia. We are a probationary IRATA member company and all our courses are available in English or Thai.

The company is owned and managed by Davie Mutch who has nearly 30 years experience in the oil and gas industry in both the diving and rope access fields.

The company has been set up in Ban Chang south east of Bangkok, and a 35 minute drive from Thailand's premier playground Pattaya. We have a purpose built unit of over 540sq/m. Inclusive to the area is a 100sq/m confined space training area and a dedicated rigging frame.

Courses are available through out the year and can be booked online by visiting www.sasthai.com All rope access courses are inclusive of airport transfers, hotel based accommodation, daily transport from hotel to training area and IRATA registration.

We are currently offering 14 day inclusive packages for any trainees wishing to combine a holiday in Thailand with their Rope Access course. Please contact admin at admin@sasthai.com for details.
