

# Access Solutions

For the Industrial world

 Abscende Ltd.  
Industrial Rope Access  
Ndt Services

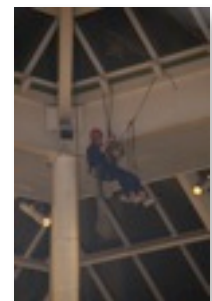

## WHAT IS ROPE ACCESS?

*Rope access is a mixture of climbing and caving techniques that has been in major industrial use for over 20 years, from clearing gutters on hotels to carrying out essential works on oil and gas platforms. The rope access technique is the most cost effective and safest difficult access solution for works done at height available to industry. It surpasses scaffold, cradles and lifting machines not only in aesthetics and efficiency but man risk hours and safety. In nearly 15 millions working hours there has only been 3 minor reportable accidents, this clearly makes rope access the right choice!*

## THE COMPANY

Abscende is based in Ireland and has been providing specialist Rope access and Non-destructive testing (NDT) techniques to a wide range of clients in various industries. We use highly trained personnel with a deeply experienced background that are hand picked for each specific job to ensure that the client receives the most competent and suitable person for the specific task. All rope access techniques are carried out to British standard BS. 7985:2002 and conform to Industrial Rope Access Trade Association (IRATA) International Codes of Practice plus all relevant EN BS standards to to with health and safety and working at height. All NDT techniques are also carried out according to British standard BS EN 4179:2005 and PCN requirements.

We provide a safe, versatile and adaptable service with the least amount of disruption to daily on goings, with reduced man-hours and reduced heavy machinery costs.

## WHY CHOOSE

## ROPE ACCESS?

Rope access is not only the most efficient choice but also the safest, from statistics gathered by the industrial rope access trade association (IRATA) since 1999 shows that rope access is 4 times safer than scaffolding

Below are some facts that prove rope access is superior to other forms of accessing heights;

### Industrial Abseiling vs. Powered Access (Cherry Picker Scissor Lift)

#### *Powered access (Cherry picker / Scissor Lift)*

Setup (after dismantling back gate to get equipment) 2 hours

Task time	3 hours
Dismantle and clear site	2 hours
TOTAL	7 HOURS**

#### *Industrial Rope Access*

Setup	0.5 hours
Task Time	3 hours
Dismantle and clear site	0.5 hours
TOTAL	4 HOURS **

## Scaffolding vs. Industrial Abseiling

### *Scaffolding*

Erection	24 hours
Task Time	8 hours
Dismantle and clear site	24 hours
TOTAL	56 HOURS

### *Industrial rope access*

Set up	1 hours
Task Time	8 hours
Dismantle and clear site	1 hours
TOTAL	10 HOURS

\*The task was to remove pigeon waste and the old bird proofing and install new bird spikes and new bird proof netting.

\*\*The task was to replace a section of guttering on a private residency.

## SERVICES

*Abscende provides services for all types of Industry from retail to oil and gas services. Below we have named but a few of the tasks that can be carried out safely and efficiently by rope access.*

### CONSTRUCTION

- REMEDIAL WORKS
- CLEANING
- WINDOW CLEANING
- INDUSTRIAL PAINTING
- BIRD NETTING / PEST CONTROL
- RIGGING AND LIFTING
- CURTAIN WALLING
- INSTALLATION / REMOVAL OF MEDIA BANNERS
- TESTING OF FALL ARREST ANCHORS
- GEOTECHNICAL DRILLING / ROCK STABILIZATION

**These are only some tasks, if you can think of any other task that may utilise the efficiency of Rope Access, give us a call!**

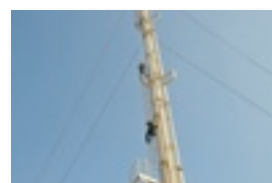

## INSPECTION SERVICES

*All disciplines of NDT including specialist services such as IRIS tube inspection, ACFM and more. All NDT personnel are highly experienced and qualified to BS EN 4179:2005. We can also offer ASNT-PCN level 3 consultancy in all aspects all over the world.*

### NON DESTRUCTIVE TESTING

- MAGNETIC PARTICLE INSPECTION
- ULTRASONIC INSPECTION
- EDDY CURRENT INSPECTION
- DYE PENETRANT INSPECTION
- CONCRETE INSPECTION
- RADIOGRAPHY INSPECTION
- MAGNETIC FLUX LEAKAGE INSPECTION

**These are only some tasks, if you can think of any other task that may utilise the efficiency of Rope Access, give us a call!**
