**All Rope Access is carried out adherent to IRATA Standards**

**Windtex** are a Liverpool based company, originally established in 2009. From January 2012 Windtex will form part of the Hargreaves Industrial Services Division, working as a part of Norec's service delivery.

Together with the support of Norec's extensive experience in health, safety and environmental management systems, Windtex will offer wind turbine service and maintenance and specialist rope access services.

Windtex carry out an extensive range of servicing competencies including

- Type 1 – after 500 running hours on newly commissioned units, 100% of torque values checked.
- Type 2 & 3 – every 6 months including basic maintenance and some bolt torquing.
- Type 4 – end of warranty service, a complex service involving all Type 1,2&3 criteria plus oil & hose changes.

*'Windtex current service all Nordex turbines within England and roughly a third within Scotland, along with 100% of access solutions'.*
