FULFIL YOUR CLIENT'S GREATEST EXPECTATIONS

A comprehensive and professional high level rope access service; from New Build design and construction, to planned maintenance, and unplanned repairs.

**Make your work-at-height requirements easy.
Contact us today to find out more on
sales@accessnorth.co.uk or **01484 506282****

Jobs that are impossible using traditional techniques can often be completed using 'work-at-height' techniques, in addition, rope access is cost-effective since it removes the need for expensive equipment, such as scaffolding or heavy plant. Offering this service will save you, and the client, money. **Let's work together...**

Planned rope access maintenance can save you up to 30% on your annual maintenance budget, call us today on **01484 506282**

WORK-AT-HEIGHT SOLUTIONS

OUR HIGHLY SKILLED TEAM ARE AVAILABLE TO PROVIDE AN EFFICIENT AND HASSLE-FREE SERVICE.

Access North Structures offer a well balanced cost-effective eco-friendly solution to those 'hard to reach' places in need of maintenance.

Industrial abseiling is one of the most cost-effective, responsive and safest solutions to accessing the most problematic areas.

We aim to 'deliver' to the highest standards, with professionalism, a wealth of experience and passion. For all our clients, either **Blue-Chip** or **SMEs**, we always go the extra mile to deliver an excellent all round service using in-house project management, and by having a fully experienced on-site team.

By working in the best interests of our clients, and providing a quality service, we find that they use us time-and-time again.

PLANNING AHEAD

OUR PLANNED MAINTENANCE SCHEME REDUCES THE NEED FOR SUDDEN, UNEXPECTED AND URGENT MAINTENANCE.

Experience shows that maintenance costs are reduced, and brought under control, when a building's fabric is inspected regularly; not to mention saving repair time and reducing operational stress. Contrary to normal perception, rope access procedures are low risk, and are a cost-effective solution to maintenance procedures; this allows for reduced quotes and the maximising of profit.

Acqudo® is a state-of-the-art software package providing continuous monitoring and automatic reporting of work in progress, and informing on structural inspections. It is a cloud-based asset management tool which **we offer as part of an inclusive package to our customers.**

Hotel façade cleaning

SPECIALIST CLEANING

HIGH LEVEL AND HARD TO REACH PLACES, THAT OFTEN APPEAR IMPOSSIBLE TO REACH, CAN BE CLEANED WITH SPECIALIST TECHNIQUES; ACCESS NORTH STRUCTURES CAN REACH THOSE PLACES.

Increasingly, pollutants, dust, grime and extreme weather make the cleaning of structures, not only desirable, but a necessity. Rope techniques, using traditional and modern methods, allow the most cost-effective and non-disruptive access to the structure to be cleaned; removing the necessity of scaffolding and all its implications.

INSPECTIONS & REPORTING

It is your client's HSE responsibility to regularly inspect and produce a report, to monitor the condition of any roofs, buildings, structures, fall-arrest/protection systems/BMUs and so on.

Our team are highly-trained in carrying out such inspections whatever your requirements. All data is securely logged on the **Acqudo**© system for you to offer a quick and accurate response to your client.

CLIENT SATISFACTION

We solve your problem.
We complete your work in the most efficient way possible.
We hope that you're delighted.

FULLY INFORMED

Our team strive to keep you fully informed on the job's progress, and aim to complete every task, on time and within budget.

PROFESSIONALISM

As a client of Access North Structures you will receive; high standards, professionalism, integrity, honesty and openness.

OUR PROMISE

Our word is our bond; we do what we agree, and on time.

WHY CHOOSE US?

A COMPLETE SERVICE ON YOUR BEHALF; MANAGEMENT OF YOUR CLIENT'S INSTALLATION, MAINTENANCE AND STRUCTURAL ASSET MANAGEMENT; WORKING IN THE MOST CONVENIENT, RESPONSIVE AND INFORMED WAY.

Our open and transparent way of working shows all operational costs, enabling good and effective financial management.

Quality assurance; you can rest assured knowing that all works are as priced with no hidden costs, unless the scope of works changes and is agreed. Our work-at-height technicians are all IRATA qualified abseilers and are highly qualified to work-at-height.

Health and Safety is paramount. A full-site inspection is carried out to inform any Health and Safety issues, and a Risk Assessment and Method Statement is prepared; it is 'signed-off' when it is to everyone's satisfaction, allowing safe work on-site to begin.

We are proud to operate on a fully insured and transparent basis which means no hidden surprises or costs. Thus ensuring that you and your company, are protected at all times.

TURN KEY SOLUTION

When circumstances allow, our team effectively become an **extension of your team** and manage your work-at-height requirements; ranging from the initial site-visit to job completion. Our Project Manager is there to guide you through every step of the way, while keeping you fully informed.

- ① **Fully insured** and **CHAS Accredited**
- ① **Site visits** and **initial consultations**
