

MAS Rope Access

MAS's Integrated Services business unit has recently added a rope access service to our capability profile, with the aim of supplying high quality rope access services to the Australian resources industry.

Rope access is a safe, quick work positioning technique used to access and perform tasks at height, developed and used worldwide throughout the oil and gas industry.

The primary goal of rope access is to carry out tasks with no incidents, accidents, dropped objects or dangerous occurrences.

What differentiates MAS's Rope Access?

First class safety

- Rope access is safe, quick and easy to mobilise.
- Has a very low injury to man hour ratio
- Rope access minimises hours spent in higher risk work areas
- Has built in safety rescue systems and the ability to self rescue
- All equipment is regularly inspected and maintained

The right people

- Highly trained IRATA technicians who bring a wealth of experience from a wide range of industries
- Multi disciplined, responsive staff who plan and deliver work scopes

Our service offering

- Net tensioning 'safety nets'
- Rigging

- Scaffolding
- Installations
- Welding/boiler making
- Mechanical fitting
- Digital inspection and reporting
- High pressure water blasting
- Abrasive blasting
- Painting
- Insulation
- General maintenance and repair
- Standby rescue
- Difficult confined space works

Customer benefits

- Cost effective solution for difficult access areas that require maintenance or repair
- Rapid deployment and set up times
- Minimisation of dropped objects through reduced materials required to complete tasks

- Innovative solutions matched to customer needs
- Access to highly skilled IRATA technicians who work in difficult areas and undertake complex tasks
- Access to responsive teams who can rescue other workers if required
- Mentoring and supervision of trainees and new staff by experienced leaders
- Cost savings through reduced machinery and plant downtime, allowing quicker returns to production

Industry standard best practice

- MAS is an Operator/Trainer member of the Industrial Rope Access Trade Association (IRATA) which is the preferred system for rope access around the world.
