

ASSET LIFECYCLE PARTNER

DECOMMISSIONING SUPPORT SERVICES

Bilfinger Salamis UK provides an integrated service range, adding value, improving efficiency and reducing costs in support of operators' decommissioning agendas.

Our experienced in-house teams are competent in a broad spectrum of services and can provide an integrated approach from the well plugging and abandonment phase, through to removal and disposal. We have the inherent knowledge and capability to support and complement our clients' project teams, delivering capability at all stages of the process.

Bilfinger Salamis has in place an experienced team with a proven track record and the capacity to deliver large scale decommissioning contracts. Our multi-disciplined specialists have extensive experience working on some of the most prominent North Sea decommissioning projects to date.

The capability to adapt to an ever-changing environment is an attribute Bilfinger Salamis and has developed over 40 years as a key provider of integrated solutions to offshore and onshore markets.

We have extensive knowledge relating to cost modelling which has proven vital to our clients' project successes during this non-producing phase, including associated activities such as platform engineering down, preparation for removal, and subsequent structure and process deconstruction requirements.

- Inspection Services
- Rope Access

ENHANCED EFFICIENCY THROUGH COLLABORATION

In conjunction with strategic alliances, Bilfinger Salamis can provide additional decommissioning support through a collaborative process which promotes transparent knowledge sharing.

These alliances with innovative vendors give us the ability to deliver market-leading facilities in an evolving environment, whilst being fully compliant with duty holder requirements.

Our key partnerships ensure that our clients have a comprehensive platform for effective decommissioning through enhanced services, delivered by a competent integrated team.

- Underdeck Survey
- Bolting and Tensioning
- Subsea Cutting
- Waste Management and Disposal

These additional service and product lines allow us to offer an efficient end-to-end service offering during this crucial non-producing time.
