

Nordic Access Oy

Nordic Access works globally, offering a professional service with multi-skilled personnel for the Oil & Gas, Energy, building maintenance and Renewables industries. Through our services, we improve the efficiency and thus the cost-effectiveness of operations and assets. Our biggest advantage is our team in the field, and we pride ourselves on using only the best. All of our employees have a proven track record of excellence and a work ethic second to none in their chosen field of expertise.

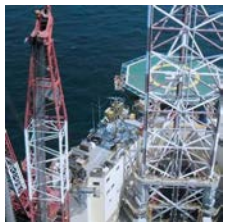

Rope Access

Nordic Access provides IRATA or equivalent personnel using rope-access techniques to access the most difficult of places at height. Save time and significant money otherwise wasted on mobile working platforms or costly scaffolding.

Lifting Gear Inspection

Evaluation and certification of all items which can move or lift things on the platform or vessel. Essential to maintaining a safe working environment ensuring all equipment is certified and fit for purpose.

DROPS Inspection

Surveys of a platform or vessel with the evaluation and corrective action to remove the risk of potentially loose or unprotected objects which could cause damage to assets, environmental damage or even loss of life.

Nondestructive Testing (NDT)

The testing of assets to ensure their suitability and fitness for purpose using techniques and methods which cause no damage to the item under test.

Building Maintenance

Highly trained IRATA certified personnel for window cleaning, guttering replacement, snow clearing, solar panel installation and any other services requiring working at height.
